

sagentia
REGULATORY
formerly TSG CONSULTING

New name. New look. Same scientific and regulatory expertise

TSG Consulting is now Sagentia Regulatory – part of a single, powerful Sagentia brand alongside Innovation, Medical, Defence and Aviation. With 300+ consultants across North America and Europe, we deliver deep insight, broad expertise, and seamless support to help you move faster and smarter.

What we do

For over 35 years, Sagentia Regulatory (formerly TSG Consulting) has been helping clients navigate the complex regulatory landscape, providing expertise to the highly regulated antimicrobial, agricultural, consumer and industrial industries.

We partner with clients to help them bring their products to market and assist in meeting their compliance goals. We act as an extension of their own internal regulatory and scientific teams.

Our broad range of services span the early stages of product development to marketplace entry and ongoing compliance and defense:

- Product registration submission and updates
- Chemical notifications
- State registrations and renewals
- Product lifecycle management
- Label requirements and claim development
- Strategy development to address data requirements
- Data gap analysis
- Data waiver requests and scientific rationales
- Project management – protocol development, study design, monitoring
- Human health assessments
- Environmental fate analysis
- Tolerance exemptions
- Exposure model development

Focus areas

At Sagentia Regulatory, we use our passion for problem solving to provide creative, strategic and high-quality scientific and regulatory guidance to help clients get their products to market. We have deep regulatory relationships with agencies including the US Environmental Protection Agency (EPA), the US Food & Drug Administration (FDA), California Department of Pesticide Regulation (DPR), and Canada's Pesticide Regulatory Directorate (PRD – formerly PMRA), as well as the European Chemicals Agency (ECHA).
